STATE OF SOUTH CAROLINA  
**Office of The Governor**  
Columbia 29211

ROBERT E. MCNAIR  
GOVERNOR

TO THE GENERAL ASSEMBLY

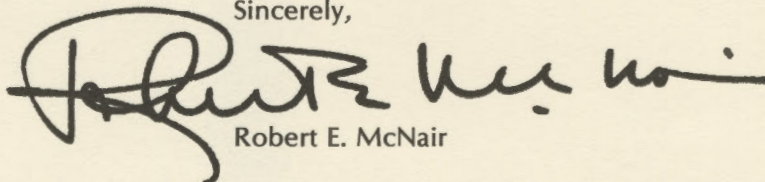

I am pleased to submit to you the first **Economic Report** of the State of South Carolina. This **Report** establishes a valuable precedent; it directs our attention to economic policy issues of most immediate concern to all of us.

In the past ten years, this State has made tremendous strides towards realizing the full potential of our resources. The extent of our accomplishments in the past - and our prospects for continuing success in the future - have been extensively examined in this **Report**.

In addition, I would like to point out several specific achievements which will facilitate our future economic development. We have begun to implement improved informational support for policy formation including an expansion of our monthly series of economic indicators. We have begun to encourage greater standardization of statistical information and closer coordination of statistical elements within our State. Finally, and perhaps most importantly, we have taken steps leading to the formation of 10 sub-State districts. This pattern has been established in recognition that, as South Carolina and its local political subdivisions increasingly are confronted with problems and opportunities extending beyond traditional boundaries, greater coordination and standardization of multi-county areas are needed.

I commend this **Economic Report** to your most careful attention and recommend strongly that consideration be given to an increasingly closer involvement of the General Assembly with the Executive in the process of economic policy formation.

Sincerely,

Robert E. McNair

The Honorable Robert E. McNair  
Governor of South Carolina  
Chairman, State Budget and Control Board

Dear Governor McNair:

It is my pleasure to transmit to you the first annual Economic Report for the State of South Carolina.

This Report has been prepared with the cooperation of many State agencies, Federal agencies and other organizations. We wish to express our gratitude to them for the information and assistance they have provided. Some data are available for the first time in this publication.

We shall be pleased to receive suggestions from users of the report for the improvement of subsequent Reports.

Most of the narrative in this Report has been prepared by the staff of this Division. While every effort has been made to treat all subject matter factually, I must point out that any opinions expressed do not necessarily represent the views of the State Budget and Control Board.

Respectfully submitted,

A handwritten signature in cursive script that reads "Thomas P. Evans".

Thomas P. Evans, Director

## CURRENT ECONOMIC OUTLOOK FOR THE NATION AND STATE

Undoubtedly, the national economy has experienced a considerable slowdown during 1969, and early 1970. As reflected by economic statistics for the first quarter of 1970, the slowdown has continued with a decline in real gross national product and an increase in unemployment during the period. In addition, inflationary pressures have continued; price and cost pressures have remained severe, although, recent data have indicated some leveling of wholesale prices which may be the beginnings of success for the Administration's fight against inflation.

There is widespread disagreement among economists at this time as to what course the United States economy will follow during the remainder of 1970. Not only is unemployment considerably higher, but the trend of industrial production is continuing downward. Furthermore, construction activity, an important indicator of how well the economy is performing, remains weak.

Consumer spending has been slow since January due partly to less rapid growth of personal income than in the past, and to a greater inclination of consumers to save as uncertainty concerning the Nation's economy has increased. Although small gains in retail sales have occurred, surveys of consumer spending intentions have offered little encouragement for a sudden upsurge. However, a gradual increase can be expected to result from the expiration of the 5 percent surcharge tax at the end of June, as well as from effects of other fiscal and monetary policies.

Although recent surveys suggest an increase in capital spending of 7.8 percent, it should be noted that this estimate has been revised downward several times, indicating decreasing optimism on the part of businessmen. Nevertheless, the 7.8 percent increase is encouraging in that it is not only a healthy increase, but represents less of a stimulus to inflation than earlier estimates. The revised estimate for the increase in capital spending reflects primarily the difficulty of businessmen in financing expansion, both because of lower sales and corporate profits anticipated for the year, and because of continued tight money conditions.

Two changes in the spring of 1970 should have significant consequences for the economy. First, a substantial Federal pay increase should offset a general weakness in the labor market due to the current high level of unemployment. Second, a retroactive increase in social security payments in April should further bolster personal income and add stimulus to consumer spending which appears to be the key factor in the outlook for the remainder of 1970.

Many economists now feel the United States is on the brink of a major recession. Given the uncertainty inherent in our current economic situation, the role of monetary and fiscal policies becomes extremely critical. In the **Economic Report of the President, 1970**, the Council of Economic Advisors sets forth two objectives for this year: reduction of prices, and revival of the growth of output. Because of the flexibility demanded in achieving these objectives, emphasis will fall primarily on monetary policy, although several changes will be significant in the Government's fiscal policy:

- In view of the recent rapid increase in the level of unemployment and the inherent difficulty in reducing spending, the President has announced that a small surplus in the Federal budget initially planned for this year is no longer a feasible or desirable goal.

- The 7 percent investment tax credit incentive to businessmen for capital expansion has been repealed with the result, hopefully, of less inflationary expansion.

- In addition to the increase in transfer payments, and the Federal pay raise, the 5 percent income tax surcharge was allowed to expire on June 30. This, coupled with Secretary of the Treasury Kennedy's announcement that the Administration will seek no new taxes this year should assist in raising disposable personal income and, thereby, stimulate consumer spending and general economic activity in turn.

-- Efforts to cut Federal spending will be continued with further reductions in defense spending as more withdrawals of American troops from Southeast Asia are made.

-- In his Economic Report to the Nation on June 17, the President made three recommendations: (1) Formation of a National Committee on Productivity to guide future economic growth; (2) Preparation and periodic presentation of inflation alerts by the Council of Economic Advisors; (3) Establishment of a Regulations and Purchasing Review Board to evaluate government spending.

Monetary policy for 1970 is somewhat more difficult to anticipate because of the flexibility monetary authorities have and utilize as they see changes occur in the economy. On the whole, however, the monetary restraint exercised by the Federal Reserve should prove to be more moderate in 1970 than in 1969. Although high interest rates are expected to continue throughout the year, expansion of the money supply should further encourage economic activity. Despite very small changes in the money supply during much of 1969, increases through May, 1970 have been rather substantial; for the year as a whole, however, a more moderate rate of increase of 3 to 5 percent can be expected.

In conclusion, the national economic outlook is mixed and uncertain in the short-run, but signs point to a moderate recovery during the second half of 1970, probably gaining momentum in the fourth quarter when Administration policies enacted earlier in the year begin to be felt and economic activity accelerates.

The South Carolina economy reflected a gradual tapering in level of economic activity beginning about the middle of 1969. More recently, economic indicators showed continued weakening in many areas through mid-1970. The State's manufacturing sector has been strongly affected. Manufacturing employment and the average workweek have declined significantly below levels recorded last year. Employment cutbacks have occurred in both durable and nondurable goods manufacturing industries. Growth has continued, however, in service type industries - following the general national trend. Therefore, although the rate of growth has slowed noticeably, total nonfarm employment has remained above the 1969 level.

Insured unemployment began a gradual upward trend during the last half of 1969 and continued into 1970; however, the insured unemployment rate for South Carolina remained lower than the average rate for the nation. Total unemployment in the State rose also, but the most marked increase began in January of the current year, rising at about the national unemployment rate.

Seasonally adjusted economic indicators which generally lead turns in the business cycle began declining about the middle of last year. Although all of the indicators do not move in the same direction at the same time at turning points in the cycle, trends become evident after several months, when a number of indicators are moving in the same direction. Data available through May do not indicate a reversal in the current downward trend. However, a few of the indicators do appear to show signs of leveling off.

The following charts show percent changes over the year by month in the United States money supply, South Carolina nonfarm wage and salary employment and the 12-month moving total of taxable sales from 1966 to 1970. The period covered shows the "mini-recession" in 1967 and the current business slowdown called by many economists a recession. From the charts, upward changes in the rate of growth in the money supply appear to lead increases in employment growth by about seven to nine months. Growth in the money supply began after February, 1970, and the Federal Reserve presumably will allow growth to continue at a moderate rate to achieve the goal of a prospering economy without excessive inflation. Assuming the past relationship continues into the future, improvement in both nonagricultural wage and salary employment and taxable sales will appear in the fourth quarter of 1970. From that point, it is expected that South Carolina will resume the former high rate of growth experienced prior to the current slowdown. Increasing employment and the corresponding decline in unemployment coupled with rising capital expenditures in the State will hopefully result in rising personal income and a healthy economy.

## GENERAL FUND REVENUES AND EXPENDITURES OF THE STATE OF SOUTH CAROLINA

South Carolina experienced an average annual growth rate of 9.4 percent in General Fund revenue (less windfall) from Fiscal Year 1959-1960 to 1968-1969. Between 1968-1969 and 1969-1970, General Fund revenue was estimated to increase about 22 percent; this exceptionally large increase was expected to result primarily from an increased rate of sales tax from 3 to 4 percent. Also the corporation income tax rate was raised from 5 to 6 percent effective for taxable years beginning after December 31, 1969.

General Fund expenditures rose at an average annual rate of 10.1 percent from 1959-1960 to 1968-1969. The higher rate of expenditures was made possible by the fact that there was considerable windfall in personal and corporation income taxes during the period and a substantial General Fund reserve at one time.

General Fund revenue is currently projected to rise about 9.1 percent from \$465.2 million in Fiscal 1969-1970 to \$507.5 million in 1970-1971. Of this total about 41 percent or nearly \$210 million is expected to come from sales tax. Much depends, of course, on how quickly the South Carolina economy regains momentum following the current slowdown. Corporation and individual income taxes are expected to provide about 31 percent or over \$157 million, and all other taxes about \$140.5 million - 28 percent.

The following charts give collections and projections of General Fund revenue and expenditures, as well as illustrate the important sources and uses of funds.

## POPULATION

The Division of Research and Statistical Services of the Budget and Control Board is involved in a program to produce population estimates and projections for the use of State and local agencies. These estimates and projections are made available to the business and academic communities. The Division is participating in the projections program in coordination with an Ad Hoc Social Sciences Advisory Committee in cooperation with the Federal Water Pollution Control Administration of the Department of the Interior. The efforts of the Committee have been to produce population projections and to review input data into the projection system in order to improve the projections. Another phase of the population program which is now underway is a cooperative Federal-State program for local population estimates. As a part of this program, the Division's estimates are published by the Bureau of the Census.<sup>1</sup>

Based on data currently available, estimates of South Carolina's total resident population as of July 1, 1968, indicated a total of 2,669,000 persons residing in the State. This was an increase of 36,000 over the July 1, 1967 estimate of 2,633,000. The components of change were 50,000 births and 22,000 deaths resulting in a natural increase of 28,000, and a net in-migration of 8,000 individuals during the year.

While the State had a net in-migration of 8,000 persons between 1967 and 1968, according to the estimates, there was still a net out-migration of 17,000 persons for the entire period between 1960 and 1968. If the present trend continues, the State may reach a level of no net-migration during the decade of the 1970's.

Reversing a trend that has been in effect since 1962, live births showed an increase during 1969. The number of deaths during 1969 was down from 1968; however, there has been a slight upward trend in the number of deaths during this decade which is to be expected with an increasing population.

The age composition of South Carolina's population shifted during the sixties. Between 1960, and 1968, the under-18 age group declined from 42 percent of the total population to 38 percent. The 18-to-64 age group increased from 52 percent to 55 percent, while the over-65 group increased from 6 percent to 7 percent.

The population of South Carolina's metropolitan counties increased 20 percent, compared to 7 percent for the non-metropolitan counties between 1960 and 1968. Within metropolitan counties, the central counties (counties that contain the principal city of the SMSA<sup>2</sup>) grew 18 percent compared to 26 percent for the contiguous counties for this period. Taken collectively, metropolitan counties showed a net in-migration while non-metropolitan counties experienced substantial out-migration. This pattern is expected to continue during the next decade.

<sup>1</sup>These estimates were produced using three methods: (1) the Census Bureau's Component Method II; (2) a composite method; and (3) a regression method. A general description of these methods can be found in U. S. Bureau of the Census, **Current Population Reports**, Series P-25, Nos. 414 and 427. Population estimates are published in Series P-26, beginning No. 2, October 31, 1969. The results of the methods will be compared to the 1970 Census counts. After evaluation, the methodologies yielding the most accurate results will be used to prepare county estimates for the State during the 1970 decade.

1960-1968

## PERSONAL INCOME

### Recent Trends in Total and Per Capita Personal Income

In 1969, personal income in South Carolina advanced 9.6 percent over the 1968 level to a total of \$6,947 million. The net increase over the year of \$606 million was the largest in the State's history and slightly above that recorded in 1966 when an increase of \$601 million was realized. From 1968 to 1969, per capita personal income in South Carolina increased 8.4 percent to \$2,580. During the 1960-69 period, per capita income in the State increased at an average annual growth rate of 7.2 percent, well above the national average annual growth rate of 5.2 percent. Despite the rapid advances, South Carolina still had the fourth lowest level of per capita personal income in the Nation in 1969 and was below the average for twelve southeastern states as well. In 1969, per capita income in the State amounted to \$2,580 compared to \$2,896 for the Southeast and \$3,680 for the United States. However, the South Carolina estimate may have been somewhat understated as a result of population estimates in excess of actual figures reported by the census. Even though South Carolina has been one of the lowest per capita income states, per capita personal income increased by 104.9 percent from 1958 to 1969 - a larger gain than that of any other state in the Southeast and significantly greater than the national average of 65.0 percent.

### Real Personal Income

Even though South Carolina's total and per capita income increased by 9.6 and 8.4 percent, respectively, from 1968 to 1969, real income (income adjusted by the United States Consumer Price Index) did not show so rapid an increase. South Carolina's real total personal income increased by only 4.0 percent and real per capita personal income increased by only 2.9 percent. While in actual amounts per capita income increased by \$208 from 1968 to 1969, in terms of real dollars per capita income increased by only \$56. From 1960 to 1969, actual personal income in monetary terms more than doubled, while real (effective) personal income rose by only 70 percent, the difference the result of inflation. During the same period, actual per capita personal income increased by 87.4 percent, but real per capita income rose by 51.2 percent.

## Personal Income by Sector

Manufacturing contributes more to personal income in South Carolina than any other economic sector. In 1968, manufacturing provided \$1,760 million in wage and salary disbursements, or about 28 percent of the total personal income distributed in South Carolina. The main area of manufacturing continues to be the textile industry, by far the largest single industry in South Carolina, providing the State with more jobs than any other industry.

Proprietor's farm income ranked second in contributions to total personal income in the State until the late 1940's when it began decreasing in importance. However, proprietor's farm income has increased over the period since 1959 until 1968 when it declined sharply, providing only \$138 million, or about 2 percent of total personal income for the year.

The government sector has followed manufacturing as the second largest contributor to personal income since the late 1940's. In 1968, government payrolls accounted for 18 percent of total personal income in South Carolina. Since 1959, government payrolls have more than doubled growing from a level of \$532 million in 1959 to \$1,155 million in 1968.

Other wage and salary sectors also have contributed significantly to personal income advances in the State. Contract construction disbursements advanced nearly 150 percent since 1959 to \$269 million in 1968. Property income and transfer payments have more than doubled and proprietor's nonfarm income gained by over 70 percent since 1959.

## EMPLOYMENT

In 1969, the average total work force in South Carolina amounted to 1,049,000. Unemployment totaled 41,700 or 4.0 percent of the work force while total employment recorded substantial gains to reach 1,007,100 in 1969.

Total employment in the State has increased by nearly 145,200 jobs since 1960. The State's economy has undergone change and diversification. While farm employment has declined sharply during this period due to mechanization and modern technology, nonfarm wage and salary employment has experienced rapid growth - the greatest occurring between 1964 and 1966 when the State realized an estimated net gain of 83,500 nonfarm wage and salary jobs. This segment now accounts for approximately 80 percent of total employment.

Over the past five years, (1964-1969) manufacturing has realized a net increase of over 61,000 jobs. Many of these were in industries relatively new to the South Carolina economy. Total manufacturing employment averaged 339,200 in 1969. The textile industry was the largest single industry in the State with 150,400 employees in 1969, a net increase of 14,200 since 1964. This industry alone accounted for about 44 percent of the manufacturing employment in South Carolina. The second largest manufacturing industry was apparel and other textile products with over 42,000 employees in 1969. Sizable growth has occurred also in electrical and non-electrical machinery, which together has a net gain of 11,300 workers during the last five years. Another industry reflecting very rapid growth has been chemicals and allied products which includes the production of synthetic fibers. This industry employed over 25,000 in 1969.

Contract construction employment has grown significantly during the period to keep pace with rising population, increased expenditures on highways, schools, homes, and the building of new and expanding industrial and other commercial facilities. In 1969, over 49,000 workers were employed in this industry.

Transportation, communications and public utilities combined has experienced an increase of 8,200 workers since 1964 to reach 35,300 in 1969. Employment gains were shared almost equally in these three industries.

The finance, insurance and real estate division employed about 28,300 persons in 1969, up 4,200 from 1964. Nearly eighty percent of the growth occurred in banking and credit agencies which reached a level of over 12,500 employees.

Services and miscellaneous industries added 16,000 persons to the payrolls between 1964 and 1969 to reach 83,100. Continued expansion in this division may be expected as population and personal income rise and leisure time increases. Included in this division are many advancing sectors of employment such as personal, business, repair, educational and medical services as well as hotels and entertainment.

Another rapidly rising segment of the State's economy has been government. The rather substantial gain of nearly 33,000 employees during the past five years has reflected a trend of increasing both the quantity and the quality of public services. Federal employment in the State rose to 34,900 by 1969 and State and local government employment reached 104,800.

The following table shows South Carolina's work force, employment and unemployment on an average annual basis for selected years with net and percentage changes.

# INDEXES OF EMPLOYMENT IN SOUTH CAROLINA

1959-1969

(1957-1959=100)

<sup>1</sup>1958-1959 was used as a base for agricultural employment.

## FINANCIAL INSTITUTIONS

### Commercial Banks

As a result of high interest rates on loans and investments and a strong demand for loans, banks showed substantial increases in revenues for the years 1967 and 1968. Higher interest rates in 1968 generated an increase in net income after taxes of 13.0 percent above the 1967 level.

## Building and Loan Associations (State Chartered) and Savings and Loan Associations (Federal Chartered)

Building and Loan and Savings and Loan Associations provide the bulk of the mortgage money for home building in South Carolina. Total assets of these financial institutions rose from \$613.9 million in 1960 to \$1,433.4 million in 1968. Mortgage loans increased from \$526.1 million to \$1,233.4 million during this period. Savings held by building and loan and savings and loan associations grew from \$538.3 million to \$1,250.3 million in 1968. The total number of individual institutions declined from 79 in 1960 to 76 in 1968.

## Consumer Finance Institutions

Formerly called Small Loan Companies, Consumer Finance Companies are defined by Statute as those that make cash advances to the public in amounts of \$7,500 or less. From 1965 to 1968, the number of Consumer Finance Companies increased almost 11 percent while loans outstanding increased 73 percent and net income of the companies increased 96 percent.

## Credit Unions

South Carolina's credit unions have become an integral part of the State's financial community. Statistics as of December 31, 1968, reveal that there were 176 credit unions with a total membership of 165,410 and combined assets of over \$89.6 million. Spectacular growth in credit unions has occurred during the 1960's. Illustrative of this growth is the fact that on January 1, 1960, there were 88 credit unions with assets of \$10.8 million dollars serving 41,000 members. Between 1960 and 1968, the number of credit unions doubled, the number of members served quadrupled, and the total value of assets increased eightfold.

Formerly called Small Loan Companies, Consumer Finance Companies are defined by statute as those that make cash advances to the public in amounts of \$2,500 or less. From 1965 to 1968, the number of Consumer Finance Companies increased almost 11 percent while loans outstanding increased 73 percent and net income of the companies increased 95 percent.

## **AGRICULTURE**

### **Cash Receipts from Farm Marketings and Government Payments to Farmers**

Cash receipts from farm marketings in South Carolina during 1968 amounted to \$374.2 million. This was 8 percent less than the \$408.4 million received from farm marketings in 1967, 5 percent less than received in 1966, and 10 percent less than the record high for the State which occurred in 1951 when receipts from farm marketings amounted to \$413.6 million.

Receipts from the sale of crops made up over 60 percent of total cash receipts in 1968, excluding Government payments, compared with 65 percent in 1966 and 1967. Receipts from the sale of livestock and livestock products accounted for 39 percent of the total in 1968, compared with 35 percent in 1966 and 1967.

Government payments to South Carolina farmers in 1968 amounted to \$52,989,000 compared with \$57,437,000 in 1967. Total cash receipts including such payments in 1968 amounted to \$427,169,000 - \$38,650,000 less than in 1967.

### **Farm Wage Rates in South Carolina**

South Carolina wage rates paid for farm labor in 1968 continued the uptrend of recent years. The index of wage rates for 1968 was more than eleven times the 1910-14 base and almost twice as high as the 1960 wage rate level. Average daily wage rates without room or board in 1968 stood at \$7.40 compared with \$4.10 in 1960. The 1968 hourly wage rates without room or board averaged 99¢ per hour - almost double the 51¢ paid in 1960.

### **Number of Farms in South Carolina and the Nation**

The number of farms expected to be operated in South Carolina during 1970 is estimated at 51,000, a decrease of about 4 percent or 2,000 farms from 1969. Total land in farms also decreased but at a slightly slower pace. The total land in South Carolina farms for 1970 is placed at 8.2 million acres, down 2 percent from the 8.4 million acres operated in 1968. While the number of farms has been declining, the average size of farm has doubled in the last two decades. The average size farm in 1970 is estimated at 161 acres, an increase of three acres from 1969 and 21 acres from 1964.

Farms operating in the nation during 1969 are estimated at 2,971,000, a 2.4 percent decline from the previous year. Total land in farms, at about 1,124 million acres, continued to decrease, but at a much slower pace than the number of farms. The number of farms expected to be in operation in the United States during 1970 is estimated at 2,895,000. The reduction in total land in farms also continues at about the same rate with a preliminary estimate of about 1,119,400. Since 1960, the number of farms has declined a fourth. During the same period, the land in farms has decreased only five percent. These changes are associated with an increase in the average size of farms from 297 acres in 1960 to 378 acres in 1969 - a 21 percent increase. Discontinuance of small farming enterprises and merging of larger units with existing farms continue as the important influences in the change in the number of farms.

FORESTRY						

Since the third Forest Survey in South Carolina was completed in 1958, the area of commercial forest has increased from 11.9 to 12.4 million acres, a gain of 4 percent. Almost two-thirds of this gain occurred in the Piedmont, where the reversion of former agricultural lands to forest is especially noticeable. Most of the remaining increase occurred in the Southern Coastal Plain, where a large share of the tree planting effort in South Carolina has been concentrated. In the Northern Coastal Plain, loss of commercial forest land to other uses has about offset gains.

The area of commercial forest owned by farm operators has decreased from 6.8 to 5.0 million acres, or 27 percent during this period. Ownership of most of this timberland apparently shifted to the miscellaneous private category - business and professional people, wage earners, housewives, retired people, and other private groups who collectively now own almost 4.3 million acres of commercial forest land in the State. Forest industries have increased their holdings from 1.7 to over 2.0 million acres, mostly in the Northern Coastal Plain. The area of public-owned forest land has remained at about 1.1 million acres.

The area of commercial forest occupied with pine and oak-pine types has increased from 6.7 to over 7.6 million acres, or 13 percent since 1958. In contrast, area occupied with hardwood types has been reduced by about 9 percent. These findings indicate a substantial amount of stand conversion and reflect pine planting and management in the State.

The area of commercial forest occupied with sapling and seedling stands has increased from 2.7 to 3.6 million acres, or 33 percent since the Third Forest Survey was completed. There has been little change in the total area occupied with poletimber and sawtimber. The area of nonstocked forest land has been reduced by almost one-half. Across the State, about 7 percent of the current timber stands have originated wholly or in part as the result of artificial regeneration since 1958. While stocking on commercial forest land has increased, however, about one out of every four acres is still poorly stocked with growing-stock trees.

The volume of growing stock has increased from 10.3 to about 12.2 billion cubic feet, or 18 percent since 1958. This increase, which reverses a downward trend in timber volume, is attributed to stepped-up efforts aimed at increasing the timber supply in South Carolina and to a general decline in annual removals up until 1961.

Net annual growth has climbed steadily during the period and now exceeds 650 million cubic feet, or about 53 cubic feet per acre. Impressive and encouraging as these growth statistics are, when compared to past growth rates, net annual growth of timber in South Carolina is still only about two-thirds of the potential if all timberlands were under optimum management.

Annual removals began to increase rapidly after 1961, reversing a downward trend that was particularly evident in the removals of pine. During the fifties, a decline in the removals of saw logs, together with the continuing decline in the use of fuelwood, more than offset the increased removals of pulpwood and veneer logs. This slack in wood requirements was temporary, however, and is now being taken up very rapidly. In 1967, net annual growth of growing stock exceeded removals by over 200 million cubic feet, or 48 percent. However, the prospective increase in wood requirements and other removals could consume this declining surplus by the end of this century, or perhaps sooner. National projections indicate that total supply of all sizes and species will fall below projected removals before 1985.

The gross value of lumber products sold in 1967 by all primary mills (except pulpmills) totaled \$139.8 million. Replacement value of these mills was estimated to be \$85.8 million. These industries employed about 10,500 persons with wages and salaries amounting to \$38.1 million.

Six pulpmills are located in South Carolina. Total daily capacity is 6,284 tons of pulp. The pulp and paper industry employs about 8,800 people (with an additional 5,900 persons working in wood harvesting) with annual wages and salaries of approximately \$89.3 million.

The 1967 totals for the South Carolina primary wood-using industries (sawmills, veneer mills, wood treaters, pulp and paper mills, and producers of miscellaneous products) were:

Gross Value of Products Sold	\$460,378,513
Annual Wages and Salaries paid 24,567 employees	127,318,917
Replacement value of plants and equipment	562,118,090

**LUMBER MILL PRODUCTION IN SOUTH CAROLINA  
1958-1968

2/ Includes 254 sawmills, 28 veneer mills, 7 wood treating plants

## INTERNATIONAL TRADE

International trade is a part of the economy of every county in South Carolina. Records of the South Carolina State Ports Authority show that 1,300 companies in total, with some companies in each of the State's 46 counties, use the ports. A county-by-county analysis has shown that the port-using industries of South Carolina employ 208,000 people out of a total State manufacturing employment of 330,000, or roughly 60 percent of the State's manufacturing employment.

During the past 20 years, the rise in foreign commerce of the State has been so significant that South Carolina has led all the States in the percentage increase in value of foreign commerce. Since 1945, the State's foreign commerce has increased from less than \$50 million a year to almost \$500 million in 1968. The potential for the future of South Carolina's ports is equally as bright according to a study by the University of South Carolina's Bureau of Business and Economic Research.

Industrial development, as economists have shown, follows almost a standard pattern progressing from primary industries to related industries to later-evolving service industries. At every stage, the ports of South Carolina have played a vital part in the evolving economic development of the State from supplying new material imports for industrialization to providing sophisticated services for modern industry.

All cargoes, including bulk cargoes, passing through State port facilities have quadrupled from 600,000 tons in 1958 to almost 2.4 million tons in 1968. During the same period, high value general cargo passing through State port facilities has tripled from 450,000 to 1.3 million tons. The majority of the cargoes handled at State terminals are high-value general cargoes, while large quantities of bulk cargoes, including oil, ores, and fertilizers, pass through private terminals.

## TOURISM AND RECREATION

Tourist activity in South Carolina during 1968 reached its highest level in the state's history, with total travel expenditures amounting to \$335 million, \$206 million of which were contributed by out-of-state visitors. The \$335 million received by travel service and transport enterprises was, in turn, circulated through the South Carolina economy as operating expenses, income to employees, and various taxes: \$117.3 million went to wholesalers and other industries; \$112.2 million became income to South Carolina people as payrolls, proprietor's income or rents, dividends, and interest; and \$33.2 million was collected in State and local taxes.<sup>1</sup>

Commercial operations centering around travel activities make up one of the most progressive sectors of the State economy. Expenditures in 1968 were 9 percent above those of the previous year. Since 1954, the rise in travel expenditures represents a 158 percent increase in South Carolina as compared with a national increase of 130 percent. Spending by out-of-state visitors from 1954 to 1968 increased by 164 percent. This contributes to the fact that the average annual growth rate of travel expenditures in South Carolina is 7 percent while tourism across the Nation is rising 6.1 percent annually.

The successful growth of the tourist industry in South Carolina is largely the result of the provision of recreational facilities for both in-State and out-of-State travelers. A broad network of State parks is maintained by the Department of Parks, Recreation and Tourism, providing camping, picnicing and other recreational facilities to almost 4.5 million people in Fiscal 1968-1969. An active program of wildlife resource development and conservation is being carried out by the South Carolina Wildlife Resources Department. Deer have been stocked in parts of the State where none have existed for many years. Public dove shooting areas have been developed. Public fishing lakes have been established such as Lake Ashwood in Lee County, Lake Brown in Barnwell County, and Lake Johnson in Spartanburg County. Public boat launching ramps have been constructed on most rivers and lakes so that both South Carolinians and out-of-state tourists can have free access to the waters of the State for boating and fishing. In total, about 700,000 acres including the Sumter National Forest have been included in the State's Wildlife Management Program. Because of the high cost of financing this program, fees for hunting and fishing licenses have been increased by the General Assembly in 1969 to provide more funds.

The year 1970 is one of the most significant years in the history of South Carolina's tourist industry. With the construction of three exhibition centers at Charleston, Columbia, and Greenville; the cooperation of its citizenry, business community, and political subdivisions; and the initiation of a massive national advertising and promotional campaign to encourage tourist participation in the State's Tricentennial celebration, South Carolina moves into a new decade which promises even greater growth for tourism in the State.

## TRANSPORTATION

### Roads and Highways

During the Fiscal Year 1968-1969, the South Carolina Highway Department completed 670 miles of primary, secondary, and Interstate highways in the State. This was a small decline from the 679 miles completed in Fiscal Year 1967-1968. Construction awards during Fiscal Year 1968-1969 totaled \$81.6 million compared to \$72.9 million in Fiscal Year 1967-1968, and \$71.6 million in Fiscal Year 1966-1967.

TOTAL HIGHWAY MILEAGE IN SOUTH CAROLINA 1961-1969

YEAR JUNE 30	TOTAL	INTERSTATE	PRIMARY	SECONDARY
1961	29,183	179	9,418	19,586
1962	30,090	250	9,429	20,411
1963	30,548	288	9,065	21,195
1964	31,425	318	9,071	22,036
1965	32,296	342	9,101	22,853
1966	32,990	348	9,101	23,541
1967	33,767	384	9,102	24,281
1968	34,446	392	9,135	24,919
1969	35,116	458	9,145	25,513

The primary source of revenue for State highway funds is the gasoline tax which comprises almost 60 percent of Highway Department revenue. The balance is made up by license fees and Federal Aid.

Effective December 31, 1968, under authorization of the Federal-Aid Highway Act of 1968, the U. S. Department of Transportation approved the extension of Interstate Route 77 into South Carolina. A 75-mile section was approved from the North Carolina line south of Charlotte, by way of Rock Hill to I-20 at Columbia. The Interstate system originally designated in the State totaled 680 miles; this was increased to 759 miles by the addition of Route I-77, which caused a sharp rise in Federal funds authorized in the State for Interstate highway construction.

### Railroads

Since 1960, total railroad mileage in South Carolina has decreased approximately 3 percent to 3,175 miles at the end of 1968. Concurrently, passenger service has been reduced in several instances since 1961 because of steady declines in the number of passengers. This, together with loss by the rail lines of much of the mail and express traffic handled on them, has left financial losses from the operation of seven of the thirteen railroads of the State.

## City Bus Transportation

City bus transportation is available in five major cities of South Carolina: Anderson, Charleston, Columbia, Greenville, and Spartanburg. For 1968, the number of passengers transported by city bus companies in the State is estimated to be 16.1 million passengers, compared with 19.8 million in 1967. This continues the downward trend since 1950, with a reduction of about 65 percent in the number of passengers transported.

## Airlines

South Carolina is served by five leading airlines, each with authority to serve New York and Washington. Direct flight service to New York is provided by two of the airlines, as is direct flight service to Washington. Other cities are accessible by connecting flights from either Atlanta or Charlotte.

There has been a rapid growth in recent years in the number of passengers served by airlines in South Carolina. Since 1960, the number of passengers enplaned annually has increased more than three and one half times, based on estimates for 1970.

Even more impressive, the growth of air freight demand originating in South Carolina has followed the national trend, with an increase of about 40 percent in 1967 over the previous year. This demand totaled approximately 44,561.6 tons in 1968. A significant segment of freight demand in the State has come from Charleston's military charter tonnage which continues at an annual rate of about 35,000 tons.

Source: South Carolina Department of Education

Total expenditures for public education including not only elementary and secondary schools, but also Opportunity School, educational television and other auxiliary programs which benefit both public schools and occupational and higher education as well, increased by approximately 17 percent from 1967-1968 to 1968-1969. An even greater increase was necessary for operations during the current year as a larger percentage of students completed a higher level of education, and the need for a higher quality product from the public school system was realized. Furthermore, additional funds were required for the establishment of a pilot pre-school program, an 800 increase in teacher salaries, a reduction of the pupil-teacher ratio to 25 students per teacher, and state support for one supervisor per 25 teachers.

## EDUCATION

### Kindergarten, Elementary and Secondary Education

Public education constitutes the largest single operation of State and local government in South Carolina. About 49 percent of the total estimated public school expenditure for the State in Fiscal Year 1968-1969 comes from appropriations by the General Assembly. Additional revenue needs are met through local taxes, federal grant-in-aid programs, contracts, gifts, and various fees and charges.

Total revenue for public education in the State from all sources increased 12.6 percent from the 1967-1968 school year to the 1968-1969 school year. The State appropriation increased by 17.5 percent from the 1968-1969 figure for operations in 1969-1970.

### Occupational Education

In addition to providing public education at the pre-school, elementary, and secondary levels, South Carolina has been a leader in occupational education. As early as 1947, the State embarked on a program of residential trade schools to provide job-oriented training for adults. Vocational education has also been emphasized as part of high school curricula. The challenge of South Carolina's expanding economic structure and industrial development has continually been met by the growth of occupational education; by 1969, enrollment in these programs totaled almost 134,000 people, including about 85,000 high school students, and 49,000 adults.

A network of Technical Education Centers was begun in 1961 in recognition of the immediate need for skilled, competent workers to hasten economic growth in the State and to close the income gap between South Carolina and the rest of the Nation. Enrollment in the TEC program has rapidly increased - in 1969-1970, approximately 70,000 South Carolinians participated in the program, bringing the total enrollment for TEC's nine years of operation to well over a quarter of a million people. In this field of education, the State has continued to assert leadership as its industrial development - and its economy as a whole - responds to the development of a well-trained, highly-skilled labor force.

### Higher Education

In the area of higher education, tremendous strides have been made in the past ten years. During this period, the State has moved forward in developing its plan for a three-tiered system of higher education, with 2-year colleges (branches of the University of South Carolina and Clemson Univer-

sity), 4-year liberal arts colleges (Winthrop College, The College of Charleston, Francis Marion College, South Carolina State College and the Citadel), and major universities, emphasizing graduate programs (Clemson University, University of South Carolina, and Medical University of South Carolina). Concurrent with the development of this plan has been growth in student enrollment over the past ten years; enrollment in State institutions has more than doubled since 1959, totaling 33,000 in 1969, while total enrollment in all colleges and universities in the State amounted to more than 56,000 in 1969. Most important of all has been the increase in the quality of higher education in the State as a result of the provision of better facilities and the attraction of more competent faculty members and administrators.

THE GOVERNOR'S EXECUTIVE ORDER OF MARCH 12, 1969  
THE SUB-STATE DISTRICT PATTERN FOR REGIONAL PLANNING.

EXECUTIVE ORDER

WHEREAS, the State and its local political subdivisions increasingly are faced by problems and opportunities which extend beyond the jurisdiction of individual local political subdivisions and which require that coordinated area-wide responses be made;

WHEREAS, the boundaries of multi-county areas used and proposed by the several agencies of the State Government vary widely, and often are in conflict one with another, and

WHEREAS, the State Government is being asked by local groups to approve groupings of counties into districts for a variety of single purposes; and

APPENDIX A

WHEREAS, the State needs a single sub-state district pattern made up of groupings of counties with common economic, physical, social, governmental and other interests, to provide a consistent framework within which planning, programming and the rendering of other services by State, Federal and local instrumentalities can be undertaken and coordinated; and

WHEREAS, the national government has recognized this problem and has expressed a policy in Bureau of the Budget Circular A-88 aimed at achieving consistent planning and development areas within the states and which gives the dominant responsibility for defining such sub-state district patterns to the respective states; and

The Governor's Executive Order of March 12, 1969

Establishing the Sub-State District Pattern

for Regional Planning

NOW, THEREFORE, pursuant to the power conferred upon me by the Constitution and laws of this State, I do hereby establish, as the official sub-state district pattern for the State of South Carolina, the pattern represented by the following groupings of counties:

- Anderson, Cherokee, Greenville, Oconee, Pickens and Spartanburg;

- Abbeville, Edgefield, Greenwood, Laurens, McCormick and Saluda;

- Chester, Lancaster, Union and York;

- Fairfield, Lexington, Newberry and Richland;

- Allendale, Beaufort, Bladen and Brunswick;

- Clarendon, Kershaw, Lee and Marion;

- Chesterfield, Darlington, Dillon, Florence, Marion and York;

- Georgetown, Horry and W.

- Berkeley, Charleston and Dorchester; and

Selected Acts of the South Carolina General Assembly

of Statewide Economic Significance

Enacted in 1969 and 1970

Given under my Hand and Seal of the Executive Department at the Capital, Columbia, this 12th day of March, in the year of our Lord One Thousand Nine Hundred and Sixty-nine and the Independent Ninety-third.

Robert McNair  
Governor

O. Frank Thornton  
Secretary of State

**THE GOVERNOR'S EXECUTIVE ORDER OF MARCH 12, 1969 ESTABLISHING  
THE SUB-STATE DISTRICT PATTERN FOR REGIONAL PLANNING.**

**EXECUTIVE ORDER**

WHEREAS, the State and its local political subdivisions increasingly are faced by problems and opportunities which extend beyond the jurisdictions of individual local political subdivisions and which require that coordinated area-wide responses be made;

WHEREAS, the boundaries of multi-county areas used and proposed by the several agencies of the State Government vary widely and often are in conflict one with another; and

WHEREAS, the State Government is being asked by local groups to approve groupings of counties into districts for a variety of single purposes; and

---

WHEREAS, the State needs a single sub-State district pattern, made up of groupings of counties with common economic, physical, social, governmental and other interests, to provide a consistent framework within which planning, programming and the rendering of other services by State, Federal and local instrumentalities can be undertaken and coordinated; and

WHEREAS, the national government has recognized this problem and has expressed a policy (in Bureau of the Budget Circular A-80) aimed at achieving consistent planning and development areas within the states and which gives the dominant responsibility for delineating such sub-state district patterns to the respective states; and

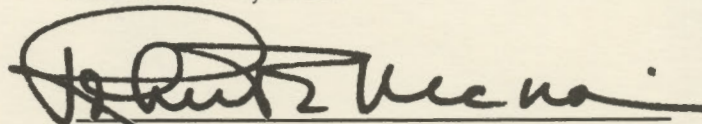

---

WHEREAS, Act 487 of 1967 Acts and Joint Resolutions of South Carolina empowers the Governor to approve the formation of regional planning organizations;

NOW, THEREFORE, pursuant to the powers conferred upon me by the Constitution and laws of this State, I do hereby establish, as the official sub-State district pattern for the State of South Carolina, the pattern represented by the following groupings of counties:

- Anderson, Cherokee, Greenville, Oconee, Pickens and Spartanburg;
- Abbeville, Edgefield, Greenwood, Laurens, McCormick and Saluda;
- Chester, Lancaster, Union and York;
- Fairfield, Lexington, Newberry and Richland;
- Allendale, Aiken, Bamberg, Barnwell, Calhoun and Orangeburg;
- Clarendon, Kershaw, Lee and Sumter;
- Chesterfield, Darlington, Dillon, Florence, Marion and Marlboro;
- Georgetown, Horry and Williamsburg;
- Berkeley, Charleston and Dorchester; and
- Beaufort, Colleton, Hampton and Jasper.

Given under my Hand and Seal of the Executive Department at the Capital, Columbia, this 12th day of March, in the year of our Lord One Thousand Nine Hundred and Sixty-nine and the Independence of the United States of America the One Hundred Ninety-third.

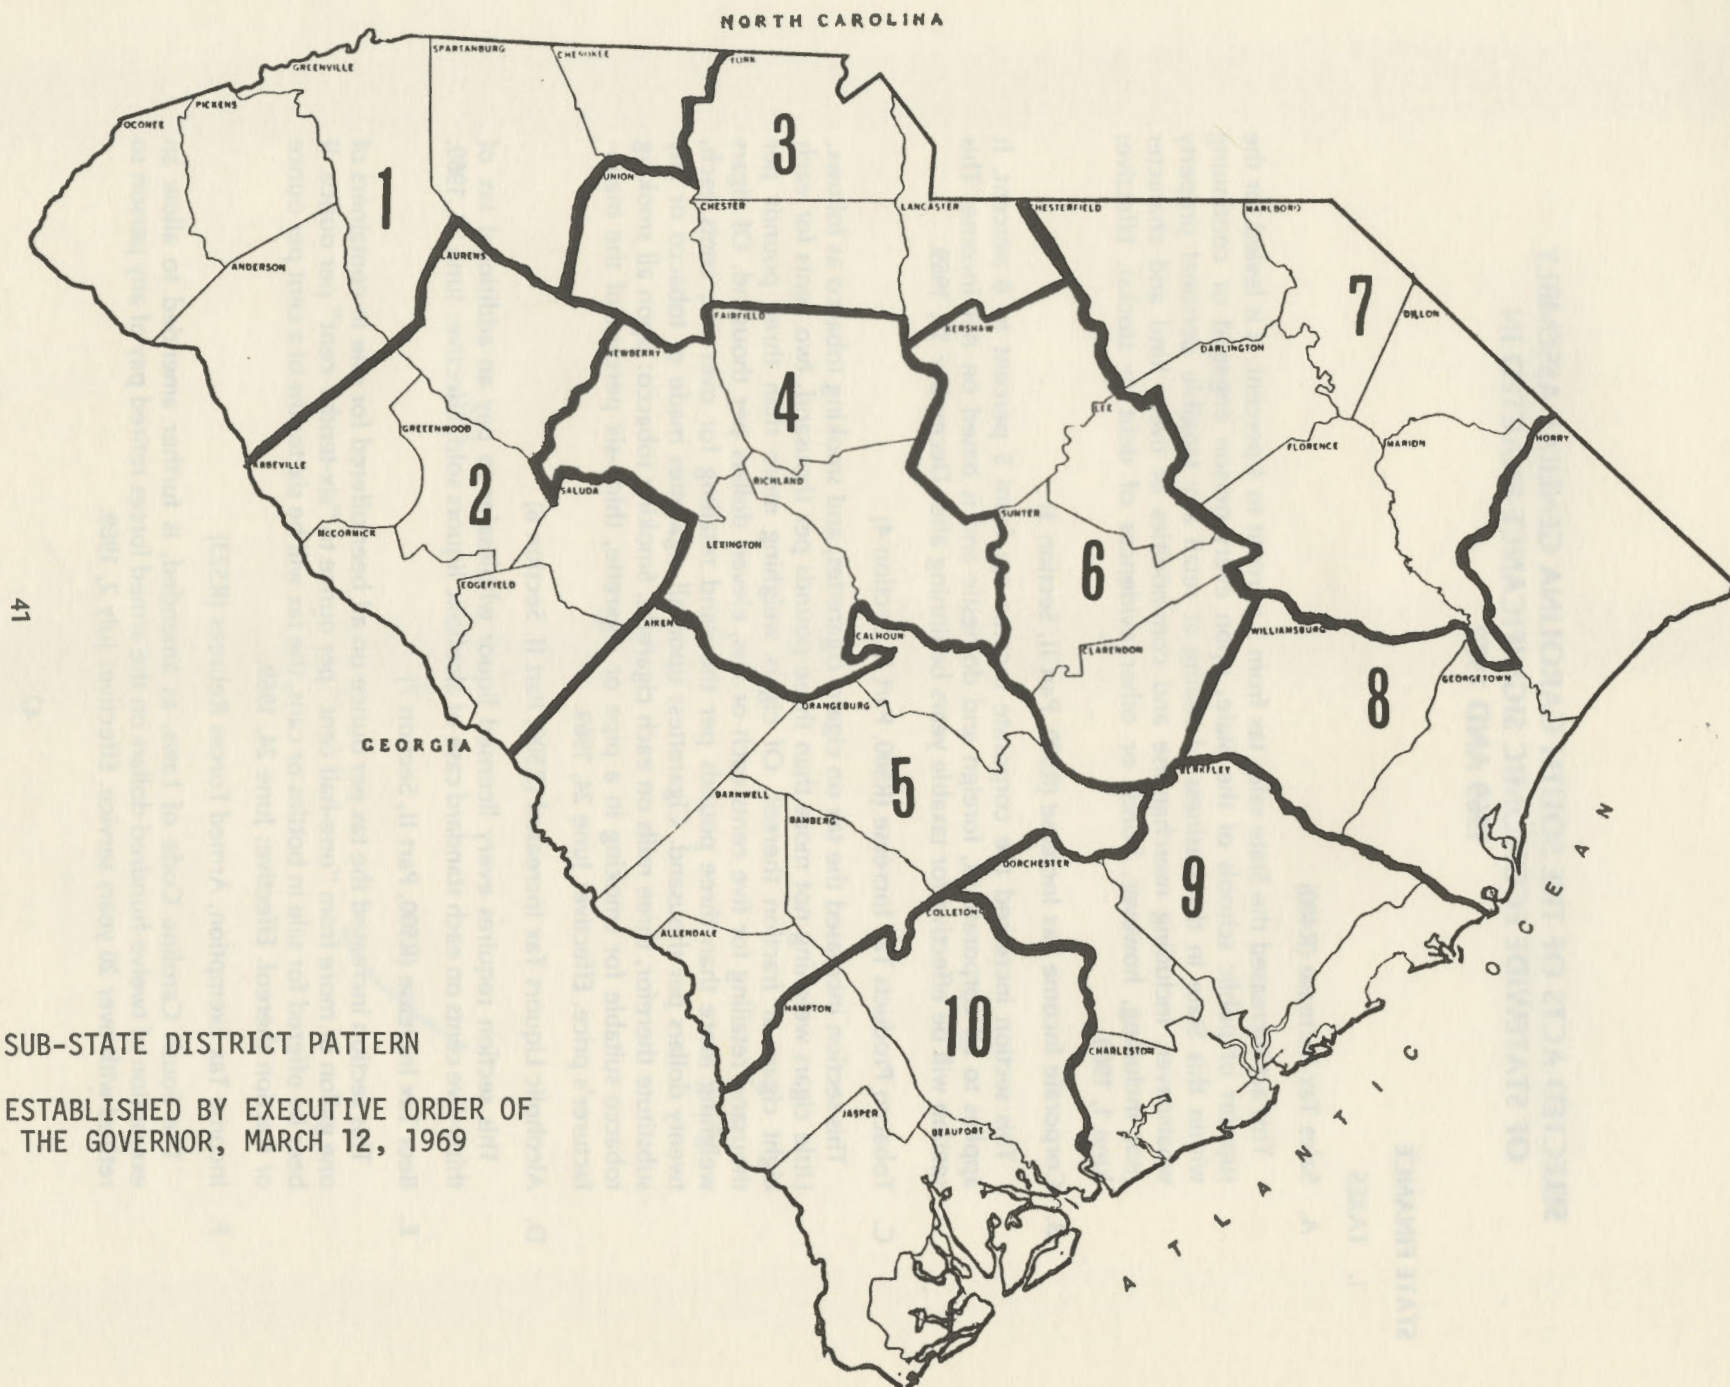

Robert E. McNair

Secretary of State

# SUB-STATE DISTRICT PATTERN

ESTABLISHED BY EXECUTIVE ORDER OF  
THE GOVERNOR, MARCH 12, 1969

**SELECTED ACTS OF THE SOUTH CAROLINA GENERAL ASSEMBLY  
OF STATEWIDE ECONOMIC SIGNIFICANCE ENACTED IN  
1969 AND 1970**

**STATE FINANCE**

**I. TAXES**

**A. Sales Tax Increase (R400)**

This act increased the State sales tax from 3 percent to 4 percent. It is levied for the support of public schools of the State, upon every person engaged or continuing within this State in the business of selling at retail any tangible personal property whatsoever, including merchandise and commodities of every kind and character (not including, however, bonds or other evidences of debt or stocks). Effective: June 1, 1969.

**B. Corporate Income Tax Increase (R500, Part II, Section 3)**

This section increased the corporate income tax from 5 percent to 6 percent. It applies to all corporations, foreign and domestic and is based on net income. This section will be effective for taxable years beginning after December 31, 1969.

**C. Tobacco Products Tax Increase (R500, Part II, Section 4)**

This section increased the tax on cigars, cigarettes, and smoking tobacco as follows: Little cigars weighing not more than three pounds per thousand, two cents for each eight cigars or fraction thereof. Of cigars weighing more than three pounds per thousand retailing for five cents each or less, eleven dollars per thousand. Of cigars weighing more than three pounds per thousand retailing for over five cents each, twenty dollars per thousand. Cigarettes: upon all cigarettes made of tobacco or any substitute therefor, three mills on each cigarette. Smoking tobacco: upon all smoking tobacco suitable for smoking in a pipe or cigarette, thirty-six percent of the manufacturer's price. Effective: June 24, 1969.

**D. Alcoholic Liquors Tax Increased (R500, Part II, Section 6)**

This section requires every licensed liquor wholesaler to pay an additional tax of thirty-five cents on each standard case of alcoholic liquors sold. Effective: June 24, 1969.

**E. Beer Tax Increase (R500, Part II, Section 7)**

This section increased the tax per ounce on all beer offered for sale in containers of one gallon or more from "one-half cent" per ounce to "six-tenths cent" per ounce. If beer be offered for sale in bottles or cans, the tax will be six-tenths of a cent per ounce or fraction thereof. Effective: June 24, 1969.

**F. Income Tax Exemption, Armed Forces Retirees (R523)**

The South Carolina Code of Laws, as amended, is further amended to allow an exemption of twelve-hundred dollars on the armed forces retired pay of any person so retired with over 20 years service. Effective: July 2, 1969.

G. Income Tax Exemption of Certain Persons Over 65 (R500, Part II, Section 2)

Any person who has attained the age of sixty-five years and who during any taxable year receives a gross income from all sources of not more than twenty-eight hundred dollars if he has no dependents or four thousand dollars if he has a dependent spouse or other dependent, as defined in Section 65-225, shall be exempt from the individual income tax imposed by Section 65-221. Effective: January 1, 1969.

H. Income Tax Deduction for Gifts and Contributions to State (R380)

This amendment to the Code of Laws relating to deductions for income tax purposes includes contributions or gifts by individuals to the State or political subdivisions thereof as an allowable deduction. Effective: May 30, 1969.

I. Depletion Allowance for Income Tax Purposes (R500, Part II, Section 5)

This amendment makes a reasonable allowance for the depreciation and obsolescence of property used in trade or business or held for investment and, in the case of mines and other natural deposits, a reasonable allowance for depletion is allowed. No allowance, in the case of depletion, may exceed that allowed under the Federal Internal Revenue Code, and neither may the amount allowed for deduction exceed the Federal Internal Revenue Code and applicable regulations. Effective: June 24, 1969.

II. INTEREST

A. Interest Rate Increase (R343)

An act to increase the interest rate on written contracts from 7 percent to 8 percent. Effective: May 20, 1969.

B. Interest Rates on Loans over Fifty-thousand Dollars (R344)

This act provides that usury shall not be available to any loan in which the amount advanced is at least fifty-thousand dollars. Provided, however, that in the case of loans in which the amount advanced exceeds fifty-thousand dollars, but not more than one hundred thousand dollars, the rate of interest shall not exceed ten percent, and on loans in excess of one hundred thousand dollars, but not more than five hundred thousand dollars, the rate of interest shall not exceed twelve percent. Effective: May 20, 1969.

C. Interest Rate and Service Charge Building & Loan and Saving & Loan Associations (R1314)

This act provides that the initial service charge cannot exceed one percent of the first \$25,000 or ½ of one percent on any amount above \$25,000. This act also permits interest rates to be increased not more than one percent above the amount originally agreed upon when the borrower agrees to it. Effective: May 1, 1970.

III. BONDS

A. State Capital Improvement Bonds (R360)

An act to amend Act No. 1377 of 1968, relating to State Capital Improvement Bonds so as to increase the interest rate from 5 percent to 6 percent, permit investments by the South Carolina Retirement System at the prevailing interest rate, and delete the limitation of investments. Effective: May 27, 1969.

B. Bonds for Expansion of the South Carolina State Ports Authority (R648)

This amendment to Act No. 1377 of 1968, as amended, authorized the issuance of additional bonds for expansion of the South Carolina State Ports Authority; to create the South Carolina Public Railways Commission and to prescribe its powers, and duties; and to authorize certain transfers to the Commission by the South Carolina State Ports Authority:

**Section 1** authorized \$8,500,000 in bonds for expansion of rail and dock facilities.

**Section 3** created the South Carolina Public Railways Commission to operate, maintain and control tracts and equipment transferred to it by the Ports Authority.

**Section 7** appropriated \$250,000 out of the General Fund for operating expense for the Commission for Fiscal Year 1969-1970. Effective: July 14, 1969.

C. Bond Issue for Off-Street Parking (R634)

An act to amend Sections 59-566.4 and 59-566.5 of the South Carolina Code of Laws, 1962, relating to parking facilities, so as to provide for further securing bonds issued for the provisions of off-street parking facilities. Effective: July 14, 1969.

D. Maximum Rate of Interest (R937)

This act fixed the maximum rate of interest which may be paid upon the obligations of the State, any county, city, town, township, public service district, special purpose district, public housing authority, school district, or any other agency or political subdivision of the State. Act No. 423 of 1969, relating to the maximum rates of interest was repealed.

The interest rate set by this act is 7 percent. However, a greater interest rate may be approved by the Budget and Control Board. The act also provides for 7½ percent bond anticipation notes for a period of not more than one year and that when such notes are sold to the Budget and Control Board, it shall establish the rate and the limitation of the act. It shall not apply to industrial revenue bonds. Effective: March 4, 1970.

IV. LOCAL GOVERNMENT

A. Speed Control Device (R513)

An act providing for the construction of speed-control devices on roads and streets in residential areas or school zones by municipalities or counties and relieving them from liability for damages occasioned thereby. Effective: July 1, 1969.

B. Beer and Wine Taxes and License Fees - Increased Allocation of (R500, Part II, Section 20)

Effective July 1, 1970, the allocation of beer and wine taxes and license fees to municipalities is increased from 12 percent to 18 percent.

C. Gasoline Tax Refund (R266)

An act to amend the Code of Laws of South Carolina relating to gasoline taxes refunded to the counties pursuant to the number of boats or watercraft registered in each county, so as to provide that the governing body of a county may refund such taxes paid on gasoline used in commercial or charter boats. Effective: May 6, 1969.

D. Personal Property Taxes on Motor Vehicles; Proof of (R1223)

This act requires applicants for motor vehicle license plates to furnish to the State Highway Department a statement from the county treasurer that such applicants do not owe any personal property taxes on motor vehicles owned by them. Effective: January 1, 1971.

## V. NATURAL RESOURCES

### A. State Fishing License Increase (R500, Part II, Section 16)

This section increased the State resident fishing license from \$3.00 to \$5.25 for those using manufactured tackle or artificial bait. Effective: June 24, 1969.

### B. State and County Hunting License Increase (R500, Part II, Section 17)

This section increased the State resident hunting license from \$4.00 to \$6.25 and the county resident license from \$1.25 to \$3.25. Effective: June 24, 1969.

### C. Combination Fishing and Hunting License (R500, Part II, Section 18)

This section created a State resident combination fishing and hunting license in addition to individual licenses. Price: \$10.25. Effective: June 24, 1969.

## VI. STATE GOVERNMENT

### A. Educational Facilities Authority (R500, Part II, Section 25)

This act designated the State Budget and Control Board as the Educational Facilities Authority. The authority to assist institutions for higher education in the construction, financing and refinancing of projects. Among other powers, the Authority is authorized to issue bonds, including bond anticipation notes. Effective: June 24, 1969.

### B. Subsistence Allowance for Members of the General Assembly Increased (R500, Part II, Section 15-A)

This act increased the subsistence allowance for all members of the General Assembly and Lt. Governor from \$15.00 per day to \$25.00 per day. Effective: January 1, 1970.

### C. Foreign Trade Zones (R928)

This act authorized the South Carolina State Ports Authority to establish foreign trade zones in South Carolina.

## VII. EDUCATION AND STATE AID

### A. State Aid for School Facilities Increased (R500, Part II, Section 11)

This act provides for State aid for school facilities at the rate of \$25.00 per pupil for the Fiscal Year 1969-1970, and at the rate of \$30.00 per pupil for Fiscal Year 1970-1971 and each year thereafter. Effective: June 24, 1969.

### B. State Aid to Teachers (R500, Part II, Section 10)

This act revised the State Aid to Teachers Pay Schedule. Effective: July 1, 1969.

### C. Vietnam Veterans' Children Benefits (R195)

This act extended benefits given to children of veterans of previous wars to further provide for children of veterans of Vietnam. Effective: April 3, 1969.

## VIII. TRANSPORTATION

### A. Implied Consent Concerning Chemical Test for Alcohol (R471)

This act provides that any person who operates a motor vehicle upon the public highways of this State shall be deemed to have given consent to a chemical test of his breath for the purpose of determining the alcoholic content of his blood if arrested for any offense arising out of acts alleged to have been committed while the person was driving a motor vehicle while under the influence of intoxicating liquor. This act also provides for the suspension of the driver's license for the refusal to submit to certain chemical tests. Effective: June 19, 1969.

S. C. STATE LIBRARY

S. C. STATE LIBRARY

B. Use Tax, Evidence of Payment (R500, Part II, Section 14)

This act adds an additional ground for refusing to register a motor vehicle, i. e., that in the case of a vehicle purchased outside the State, satisfactory evidence of the payment of the South Carolina Use Tax has not been presented. Effective: June 24, 1969.

C. Gasoline, One Cent Tax Made Permanent (R834)

This act amends Sections 65-1062.1, 65-1075 and 65-1081.1, Code of Laws of South Carolina 1962, relating to the one cent tax on gasoline to be expended on the State Highway secondary system so as to provide that such tax shall not expire on June 30, 1972.

B-17  
PRICE INDEX FOR NEW ONE-FAMILY HOUSES SOLD IN THE UNITED STATES  
1963-1968

The annual price index for new one-family houses sold increased about 7 percent from 1967 to 1968, according to preliminary statistics issued in a recent press release by the Bureau of the Census. This increase accounted for over one-third of the 18 percent gain in the index over the five-year period from 1963 to 1968.

INDEX OF THE PRICE OF NEW ONE-FAMILY HOUSES SOLD  
INCLUDING VALUE OF SITE, 1963-1968  
(1963 = 100)

Year	Index	Percent Change Year-to-Year
1963	100.0	-
1964	101.1	1.1
1965	103.5	2.4
1966	106.5	2.9
1967	110.3	3.6
1968 Prel.	117.9	6.9

This index is designed to measure year-to-year changes in the sales price of new houses with the same characteristics, whereas changes in the average price of all new houses sold also reflect shifts in the characteristics of the houses which are built. Thus, in contrast to the 18 percent increase in the house price index from 1963 to 1968, the average actual sales price for all new one-family houses sold in this five-year period increased about 37 percent, in consequence of the shift to larger houses with more equipment during these years.
